

A1  
Concl.  
5. (Amended) A system according to claim 1, characterized in that each shopping cart (3) is provided with an optically determinable individual identification.

6. (Amended) A system according to claim 1, characterized in that the collection point (1) is provided with an optical signal transmitter (5) that operates in an IR range.

A2  
Sub. B2  
8. (Amended) A system according to claim 6, characterized in that the detection means include a number of evaluation units (8) attached to the shopping carts (3) that generated the signal to the issue bonus upon receiving a light signal (13) that was received and redirected by the shopping cart (3) in front of them.

A3  
Sub. B2  
11. (Amended) A system according to claim 6, characterized in that the optical signal transmitter (5) is made up of a common lighting system with a modulated light signal (6).

A4  
Sub. B2  
14. (Amended) A process according to claim 12, further comprising attaching an individualized identification that is optically recognizable to each of the shopping carts.
